GLOBAL BUSINESS

Target technology

rare earth extraction from end-of-life permanent magnets

Australian Strategic Metals (ASM) confirmed that Energy Fuels completed the 100% acquisition through a members' scheme of arrangement on 28 August 2026, with ASM delisted from the ASX official list on 31 August. Eligible shareholders received 0.053 new Energy Fuels CDIs or shares, together with cash consideration of A\$0.13 per ASM share. The companies presented the combination as a major step toward a secure, diversified Western rare earth supply chain, with the new securities commencing trading on the ASX, NYSE American and TSX.

 Target technology

virus validation and MCB/WCB characterization

Charles River Laboratories and Medigen Vaccine Biologics Corp are collaborating on the characterization and validation of the virus seed bank for Medigen's next-generation multivalent enterovirus vaccine. Charles River will apply next-generation sequencing and other advanced analytical platforms to support genetic analysis, pathogen detection, and vaccine safety. The collaboration is intended to accelerate high-quality vaccine development, strengthen global regulatory readiness, and help reduce animal testing.

GLOBAL BUSINESS

Target technology

RF semiconductor for satellite communication and radar

Infineon will acquire C2i Semiconductors to expand its innovation capabilities in AI data-center power-management solutions. The companies will combine Infineon's global scale, application know-how, and silicon, SiC, and GaN power-semiconductor portfolio. They aim to accelerate innovation in AI power-delivery systems and establish a foundation for future substrate-integrated voltage regulators (SIVRs) through vertical power-delivery solutions.

GLOBAL BUSINESS

Target technology

silicon anode material technology

Nexeon completed a £100 million investment round to expand its UK operations and strengthen the battery supply chain, with £52.6 million committed by the National Wealth Fund and new participation from Korea Development Bank and Honda Xcelerator Ventures. Its silicon anode materials enable higher-energy-density lithium-ion batteries, supporting shorter charging times and longer electric-vehicle range. The funding will support a UK pilot manufacturing facility, research and development, advanced manufacturing capabilities, and skilled job creation. Nexeon is also operating the world's first volume-production facility for silicon-carbon materials in Gunsan, South Korea, while advancing high-volume manufacturing and global customer adoption.

GLOBAL BUSINESS

 Target technology

rare earth extraction from end-of-life permanent magnets

Mkango Resources has completed the €8 million acquisition of Remloy, a rare earth magnet recycling business from Heraeus Amloy Technologies, including a plant in Bitterfeld, Germany. Remloy uses a melting-based medium-loop process to recycle end-of-life rare earth magnets into neodymium-iron-boron (NdFeB) alloy powders for bonded and hot-deformed magnet markets. The process complements HyProMag’s short-loop recycling route for sintered magnets and Mkango Rare Earths UK’s long-loop process for mixed rare earth carbonates and oxides.

Global Business Trends by Item

Companies with no signal among the five indicators this month, but with global business activity in August directly tied to their target item or technology. Monitored for potential escalation into a signal.

Albemarle

Battery cathode materials

USA

Target item / technology **cathode material lithium hydroxide/carbonate**

Global business trend, August

Albemarle reported second-quarter 2026 consolidated sales of \$1.7 billion, up 31% year over year. Energy Storage sales rose 73% to \$1.3 billion, driven by higher lithium pricing, with lithium salts and spodumene sales reported on a lithium carbonate equivalent basis. Segment adjusted EBITDA increased by \$504 million to \$723 million, indicating that stronger lithium material pricing supported improved profitability.

Source Albemarle - Newsroom / Newsroom / News 2026.08.05

Boeing

Aircraft & clean propulsion

USA

Target item / technology **aerospace electric motor and high-power battery propulsion module**

Global business trend, August

Boeing and Archer signed definitive agreements for Archer’s acquisition of Wisk Aero, SkyGrid and Insitu, combining capabilities in autonomy, electric vertical takeoff and landing (eVTOL) aircraft, and unmanned aircraft systems to build an end-to-end physical AI platform for aerospace and defense.

Source Official press release · Boeing - News Releases and Statements / Press Releases / Statements 2026.08.10

Ouster

Robotics LiDAR

USA

Target item / technology **robot LiDAR**

Global business trend, August

GUSS Automation, a wholly owned John Deere subsidiary, plans to integrate Ouster’s Rev8 OS0 native-color digital lidar sensors, powered by L4 Ouster Silicon, into its next-generation autonomous orchard machine fleet. High-value crop environments require additional perception because conventional GPS often lacks the centimeter-level precision needed for safe navigation.

Source Official press release · Ouster - News Releases / Press Releases 2026.08.26

Global Business Trends by Item

NXP

Aerospace RF chips

Netherlands

Target item / technology

RF semiconductor for satellite communication and radar

Global business trend, August

NXP's automotive Trimension NCJ29D6 family will be deployed across BMW Group's vehicle fleet, beginning with selected 2026 vehicle programs. The solution integrates secure fine-ranging and short-range radar capabilities in a single chip, supporting safety functions such as continuous occupant presence detection.

Source Official press release · NXP - Media Center Press Releases / Newsroom / Media 2026.08.04

Evonik Industries

Eco-friendly silica

Germany

Target item / technology

precipitated silica for eco-friendly tires

Global business trend, August

In Q2 2026, Evonik's sales rose 11% as both volumes and prices increased 7%, supported by supply-chain bottlenecks outside Europe linked to the Middle East conflict. Its Inorganics business recorded a slight sales increase, benefiting from higher demand for precipitated silicas. Adjusted EBITDA increased 25% to €333 million, driven by higher volumes, pricing, and improved capacity utilization.
