Investment Signals

Monthly monitoring of investment signals at 77 target companies

30 major investment promotion projects · 77 target companies selected by MOTIR
5 leading indicators tracked per company · Pre-decision signals only

5 Leading Indicators of Investment

1 **Geopolitical Supply Chain Resilience**
Reducing regional dependency, diversifying supply chains, and addressing regulatory risks

2 **Production Expansion & Footprint Diversification**
Evaluating new APAC facility expansions and conducting production site feasibility studies

3 **Debt & Equity Financing**
Large-scale funding through corporate bonds, equity raises, and credit facilities

4 **R&D and Technology Partnerships**
Joint R&D, technology licensing, PoCs, and equity-stake talks

5 **C-Level Executive Moves**
C-suite changes, low-profile visits to Korea, and due diligence coordination

Signal Details by Company

Albemarle

Lithium & Cathode Materials | USA

1	Geopolitical Supply Chain Resilience	No signal in September
2	Production Expansion & Footprint Diversification	No signal in September
3	Debt & Equity Financing	No signal in September
4	R&D and Technology Partnerships	No signal in September
5	C-Level Executive Moves	

Albemarle announced that Ragnar Udd will serve as President and Chief Executive Officer, effective February 1, 2027.

Source: Albemarle - Newsroom / News Sep 3, 2026

Business Developments

Target technology **Cathode raw materials (lithium hydroxide, lithium carbonate)**

Albemarle Corporation is executing projects to boost its global lithium conversion capacity. In Chile, its Salar yield improvement project has achieved a 50-60% operating rate. The company submitted the environmental assessment permit for a commercial direct lithium extraction project at Salar de Atacama in March 2026. Additionally, the CGP3 expansion at the Greenbushes spodumene mine in Australia is underway and is expected to reach full production in the first quarter of 2027.

Signal Details by Company

Norsk Hydro

Non-Ferrous Metals & Recycling | Norway

1	Geopolitical Supply Chain Resilience	No signal in September
2	Production Expansion & Footprint Diversification	No signal in September
3	Debt & Equity Financing	No signal in September
4	R&D and Technology Partnerships	Hydro and CHANEL Fragrance and Beauty signed a strategic partnership to accelerate the development of low-carbon aluminum for the beauty and fragrance industry, and will jointly explore emission-reduction methods including batch-produced aluminum testing, enhanced traceability, and the use of aluminum recovered from end-of-life products. Source: Norsk Hydro - News / Newsroom Sep 28, 2026
5	C-Level Executive Moves	No signal in September

Business Developments

Target technology

Maximizing recycled (scrap) content in non-ferrous metal production

Hydro and CHANEL Fragrance and Beauty signed a strategic partnership to accelerate the development of low-carbon aluminum for the beauty and fragrance industry. The agreement establishes a shared roadmap through 2030 to develop low-carbon aluminum packaging solutions for fragrance, makeup, and skincare products.

Signal Details by Company

BASF

Nylon Intermediates | Germany

1	Geopolitical Supply Chain Resilience	No signal in September
2	Production Expansion & Footprint Diversification	No signal in September

3 Debt & Equity Financing

BASF has mandated Citi, Deutsche Bank, Goldman Sachs and J.P. Morgan as Global Coordinators to lead the preparation of the planned initial public offering of its Agricultural Solutions business, targeting readiness by mid-2027 on the Frankfurt Stock Exchange.

Source: Press release · BASF - Investor Releases Sep 14, 2026

4	R&D and Technology Partnerships	No signal in September
5	C-Level Executive Moves	No signal in September

Business Developments

Target technology **Hexamethylenediamine (HMD) production technology for nylon**

BASF is expanding its engineering plastics portfolio with new Ultradur RC1 grades, which are glass fiber-reinforced PBT/PET compounds containing up to 30% post-consumer recycled content. These compounds are designed for structural automotive components, including brackets, housings, and connectors.

Global Business Developments by Company

These companies had no signals in September but reported developments tied directly to their target technologies. All are monitored for emerging signals.

Cognex

Machine Vision & Sensors | USA

Target technology

3D vision sensors

September Developments

On September 22, 2026, Cognex agreed to acquire RealSense, a leader in depth-sensing cameras and vision technology for robotic perception and physical artificial intelligence, for $500 million in cash. The transaction is expected to close in the fourth quarter of 2026.

Source: Cognex - SEC EDGAR / 8-K Sep 22, 2026

Charles River

Biologics Safety Testing | USA

Target technology

Virus validation and master/working cell bank characterization

September Developments

Charles River introduced rapid cell banking programs offering a 40% reduction in cell bank production timelines over the industry standard of 20 weeks. The platform combines rapid cell bank and release packages with Next-Generation Sequencing (NGS) characterization to enhance product quality, safety, and regulatory readiness while reducing overall development timelines.

Source: Press release · Charles River - News Releases / Press Releases Sep 17, 2026

Ouster

Lidar & 3D Sensing | USA

Target technology

Lidar sensors for robots

September Developments

Ouster announced growing customer demand for its Rev8 OS1 Max native color digital lidar, as payload integrators and drone OEMs across the aerial mapping market select the sensor for utility corridor inspection, infrastructure management, and defense applications.

Source: Press release · Ouster Sep 15, 2026

Global Business Developments by Company

magniX

Aerospace & E-Propulsion | USA

Target technology

Electric motors and high-power battery propulsion modules for aircraft

September Developments

On September 25, 2026, magniX's Samson300 batteries powered the first flight of Bye Aerospace's eFlyer 2 prototype at Centennial Airport near Denver, Colorado.

Source: Press release · Magnix - Newsroom JSON Sep 25, 2026

Siemens Gamesa

Offshore Wind Turbines | Spain

Target technology

Offshore wind turbines

September Developments

Siemens Gamesa expects to book one large offshore order this quarter, though it does not anticipate a full catch-up for offshore orders pushed out to fiscal year 2027. The company marked a turnaround milestone with its first positive quarterly result since the fourth quarter of fiscal year 2022, keeping its full-year breakeven target on track.
