Investment Signals

Monthly monitoring of investment signals across 77 target companies

30 major investment promotion projects · 77 target companies selected by MOTIR
5 key investment signals tracked per company · Pre-decision signals only

The 5 Key Investment Signals

1 **Supply Chain & Political Risk Management**
Reducing regional dependency, diversifying supply chains, and addressing regulatory risks

2 **Factory Expansion & Diversification of Production Bases**
New factory opening or facility construction in the Asia-Pacific (APAC) region

3 **Capital Raising & Securing Liquidity**
Getting extra cash by issuing corporate bonds, new share issuance, or bank loans

4 **Tech Partnerships & Joint Research**
Joint R&D, sharing tech licenses, testing new ideas, or buying shares in partner companies

5 **Top Executives' Activities**
C-level executives moving to new positions, business trips to Korea, or checking out local business sites

Signal Details by Company

Corning

EUV Mask Substrates | USA

1	Supply Chain & Political Risk Management	No signal in September
2	Factory Expansion & Diversification of Production Bases	No signal in September
3	Capital Raising & Securing Liquidity	

On September 11, 2026, Corning entered into an equity distribution agreement with Goldman Sachs & Co. LLC to sell up to $2 billion of its common stock through an "at the market" offering program, with Goldman Sachs acting as sales agent.

Source: Corning - SEC EDGAR / 8-K Sep 12, 2026

4	Tech Partnerships & Joint Research	No signal in September
5	Top Executives' Activities	No signal in September

Business Developments

Target technology **EUV mask blanks**

No related business developments found in September 2026.

Signal Details by Company

Charles River

Biologics Safety Testing | USA

1	Supply Chain & Political Risk Management	No signal in September
2	Factory Expansion & Diversification of Production Bases	No signal in September
3	Capital Raising & Securing Liquidity	No signal in September
4	Tech Partnerships & Joint Research	On August 20, Charles River Laboratories announced a collaboration with Medigen Vaccine Biologics Corp/MVC to apply next-generation sequencing to MVC's new multivalent enterovirus vaccine program. Under the partnership, Charles River will characterize and validate the virus seed bank to support regulatory requirements. Source: Yahoo Finance Sep 22, 2026
5	Top Executives' Activities	No signal in September

Business Developments

Target technology

Virus validation and master/working cell bank characterization

Charles River Laboratories International introduced rapid cell banking programs that shorten cell bank production timelines by about 40% relative to the 20-week industry standard, integrating rapid microbiological methods and CGMP-compliant Next-Generation Sequencing (NGS) to support biologic and advanced therapy development.

Signal Details by Company

Cytiva

Bioprocessing Technology | USA

1	Supply Chain & Political Risk Management	No signal in September
2	Factory Expansion & Diversification of Production Bases	No signal in September
3	Capital Raising & Securing Liquidity	No signal in September
4	Tech Partnerships & Joint Research	Cytiva and WhiteLab Genomics are partnering to use AI to accelerate cell line development, aiming to advance stable cell line development in AAV genomic medicine and shorten the timeline to clinical development. Source: Manufacturing Chemist Sep 21, 2026
5	Top Executives' Activities	No signal in September

Business Developments

Target technology

Cell-culture and purification systems for biologics production

Cytiva unveiled the new ÄKTA readyflux system for low-volume drug manufacturing. The single-use platform is designed to streamline technology transfers, improve consistency, and reduce downtime.

Signal Details by Company

Moderna

Cell & Gene Therapy | USA

1	Supply Chain & Political Risk Management	No signal in September
2	Factory Expansion & Diversification of Production Bases	No signal in September

3 Capital Raising & Securing Liquidity

Moderna intends to offer $2.0 billion aggregate principal amount of convertible senior notes due 2032 in a private placement, and plans to grant initial purchasers an option to purchase up to an additional $300.0 million aggregate principal amount of the notes.

Source: Moderna - SEC EDGAR / 8-K Sep 2, 2026

4	Tech Partnerships & Joint Research	No signal in September

5 Top Executives' Activities

Moderna added a Chief Operating Officer role to support its increasing scale and diversification, and announced that Juan Andres will return to the company as Chief Operating Officer, effective October 5, 2026.

Source: Moderna - SEC EDGAR / 8-K Sep 30, 2026

Business Developments

Target technology **Delivery systems and GMP raw materials for gene and cell therapies**

Merck & Co. and Moderna announced that their mRNA cancer vaccine, intismeran autogene, lengthened patient survival in a phase 3 study, reigniting hopes for personalized medicine. When paired with Keytruda as an adjuvant therapy in resected melanoma, the vaccine showed improvements in recurrence-free survival and distant metastasis-free survival.

Signal Details by Company

Albemarle

Lithium & Cathode Materials | USA

1	Supply Chain & Political Risk Management	No signal in September
2	Factory Expansion & Diversification of Production Bases	No signal in September
3	Capital Raising & Securing Liquidity	No signal in September
4	Tech Partnerships & Joint Research	No signal in September

5 Top Executives' Activities

Albemarle appointed Ragnar Udd as President and Chief Executive Officer, effective February 1, 2027.

Source: Albemarle - Newsroom / News Sep 3, 2026

Business Developments

Target technology **Cathode raw materials (lithium hydroxide, lithium carbonate)**

As part of the leadership transition, current Chairman and CEO Kent Masters will serve as Executive Chairman through the company's 2027 annual meeting of shareholders. Ragnar Udd will also join the Albemarle Board of Directors, while Gerald Steiner will continue serving as Lead Independent Director. Udd brings more than 25 years of experience leading global resources businesses, most recently serving as Chief Commercial Officer of BHP.

Signal Details by Company

Chemours

Ion-Exchange Membranes | USA

1	Supply Chain & Political Risk Management	No signal in September
2	Factory Expansion & Diversification of Production Bases	No signal in September
3	Capital Raising & Securing Liquidity	Chemours secured approximately $10 million in approved U.S. Government grant funding for advanced mineral separation R&D, with room to expand on further support. Source: Chemours - SEC EDGAR / 8-K Sep 9, 2026
4	Tech Partnerships & Joint Research	No signal in September
5	Top Executives' Activities	No signal in September

Business Developments

Target technology **Ion-exchange and bipolar membranes**

No related business developments found in September 2026.

Signal Details by Company

Amkor Technology

Semiconductor Packaging & Test | USA

1	Supply Chain & Political Risk Management	No signal in September
2	Factory Expansion & Diversification of Production Bases	Amkor Technology announced phase 2 of its Arizona advanced packaging and test campus, which is expected to add 60,000 square meters of cleanroom space to bring the total to approximately 93,000 square meters and increase the project's planned investment to approximately $12 billion. Source: Press release · Amkor Technology Sep 8, 2026
3	Capital Raising & Securing Liquidity	No signal in September
4	Tech Partnerships & Joint Research	Amkor Technology formed a multiyear strategic partnership with NVIDIA to develop advanced semiconductor packaging and test technologies for AI and accelerated computing platforms. Under the agreement, NVIDIA will provide a prepayment for Amkor's U.S. packaging capacity expansion. Source: AZ Big Media Sep 28, 2026
5	Top Executives' Activities	No signal in September

Business Developments

Amkor Technology plans to add six factory buildings on idle land at its Gwangju factory in the Cheomdan district of Buk-gu for phased expansion through 2035. To support this investment, South Jeolla-Gwangju and Jangseong-gun signed a semiconductor wastewater treatment memorandum of understanding.

Signal Details by Company

onsemi

Automotive Vision & Imaging | USA

1	Supply Chain & Political Risk Management	No signal in September
2	Factory Expansion & Diversification of Production Bases	No signal in September
3	Capital Raising & Securing Liquidity	No signal in September
4	Tech Partnerships & Joint Research	Valens Semiconductor entered into a collaboration agreement with onsemi on September 22, 2026, to develop a cost-optimized image sensor incorporating MIPI A-PHY connectivity for the 3MP automotive camera segment. Source: Yahoo Finance Sep 22, 2026
5	Top Executives' Activities	No signal in September

Business Developments

Target technology

Cameras and image signal processors (ISPs) for autonomous vehicles

Onsemi unveiled the Embedded Power Platform (EPP) in Scottsdale, Arizona, on September 16, 2026, integrating multiple dies into a single silicon device to redefine system power delivery. The company expects to begin sampling EPP in 2026, with Subaru Corporation participating as an early engagement partner to evaluate the platform for future electrified vehicle architectures.

Source: Press release · Onsemi Sep 16, 2026

Signal Details by Company

3M

Diversified Industrials | USA

1	Supply Chain & Political Risk Management	No signal in September
2	Factory Expansion & Diversification of Production Bases	No signal in September
3	Capital Raising & Securing Liquidity	No signal in September
4	Tech Partnerships & Joint Research	3M is advancing spectral-filtering solar technology through its ongoing partnership with Voltiris, and the companies recently launched an outdoor pilot in the Canary Islands to test Voltiris' Voltimax spectral-filtering module under open-field conditions. Source: 3M News Center Sep 15, 2026
5	Top Executives' Activities	No signal in September

Business Developments

3M is collaborating with Genius Electronic Optical Co., Ltd. (GSEO) to advance technology development and manufacturing for its Expanded Beam Optics (EBO) solutions by acquiring approximately 4.7% of GSEO's common shares. Additionally, 3M and BOE established a joint innovation laboratory to accelerate next-generation display technology development.

Signal Details by Company

Ouster

Lidar & 3D Sensing | USA

1	Supply Chain & Political Risk Management	No signal in September
2	Factory Expansion & Diversification of Production Bases	No signal in September
3	Capital Raising & Securing Liquidity	No signal in September
4	Tech Partnerships & Joint Research	Ouster formed a strategic partnership with GeoCue to integrate its Rev8 OS1 Max digital lidar into GeoCue's TrueView product line, following joint flight testing and firmware tuning in Huntsville, Alabama. Source: Press release · Ouster Sep 2, 2026
5	Top Executives' Activities	No signal in September

Business Developments

Target technology — **Lidar sensors for robots**

Ouster announced strong customer momentum for its Rev8 OS1 Max native color digital lidar, as payload integrators and drone OEMs across the aerial mapping market select the sensor for utility corridor inspection, infrastructure management, and defense applications.

Source: Press release · Ouster Sep 14, 2026

Signal Details by Company

Applied Materials

Semiconductor Equipment | USA

1 Supply Chain & Political Risk Management

Applied Materials plans to invest $5 billion in India over the next decade, expanding its research, supply-chain, and workforce capabilities as India tries to establish itself as a semiconductor manufacturing hub. Expanding in India could diversify geopolitical exposure, but it does not eliminate execution, regulatory, or capital-allocation risks.

Source: Yahoo Finance Sep 22, 2026

2 Factory Expansion & Diversification of Production Bases — No signal in September

3 Capital Raising & Securing Liquidity — No signal in September

4 Tech Partnerships & Joint Research

KIOXIA Corporation will join Applied Materials' EPIC Center in Silicon Valley as an innovation partner to advance next-generation memory technologies. The companies will collaborate to develop advanced memory structures, chip stacking technologies, and materials engineering innovations to increase AI memory performance.

Source: Press release · Applied Materials Sep 29, 2026

5 Top Executives' Activities — No signal in September

Business Developments

Applied Materials is expanding its advanced packaging joint laboratory with Singapore's Agency for Science, Technology and Research (A*STAR), building on five years of collaborative R&D projects.

Source: CRN Asia Sep 28, 2026

Signal Details by Company

Prodrive

Power & Control Electronics | Netherlands

1	Supply Chain & Political Risk Management	No signal in September
2	Factory Expansion & Diversification of Production Bases	No signal in September
3	Capital Raising & Securing Liquidity	No signal in September
4	Tech Partnerships & Joint Research	Prodrive Technologies participated in the funding round for Fortaegis, and Peter Janssen, founder and chief technology officer of Prodrive Technologies, stated the company's commitment to supporting Fortaegis's transition to scalable production and deployment. Source: AI Insider Sep 14, 2026
5	Top Executives' Activities	No signal in September

Business Developments

Avia Ingeniería y Diseño collaborated with Prodrive Technologies, utilizing its DC-DC converters to develop a practical micro-hybrid platform for commercial vehicle electrification.

Source: Press release · Prodrive - Press-release / Press Releases Sep 23, 2026

Signal Details by Company

ASML

Lithography Equipment | Netherlands

1	Supply Chain & Political Risk Management	No signal in September
2	Factory Expansion & Diversification of Production Bases	No signal in September
3	Capital Raising & Securing Liquidity	No signal in September
4	Tech Partnerships & Joint Research	

Samsung Electronics and ASML stated they would expand their partnership on next-generation lithography technologies for advanced AI chips, with Samsung planning to help develop a next-generation 12-inch photomask platform for High-NA EUV manufacturing.

Source: The Korea Herald Sep 8, 2026

5	Top Executives' Activities	No signal in September

Business Developments

Target technology **EUV lithography systems**

ASML announced that Samsung and TSMC agreed to adopt its high-numerical aperture (NA) extreme ultraviolet (EUV) lithography machines to manufacture semiconductors by 2028 and 2030, respectively.

Signal Details by Company

NXP

RF & Radar Semiconductors | Netherlands

1	Supply Chain & Political Risk Management	No signal in September
2	Factory Expansion & Diversification of Production Bases	No signal in September
3	Capital Raising & Securing Liquidity	

On September 1, 2026, NXP B.V. entered into a facility agreement with the European Investment Bank for a $250.0 million unsecured senior loan facility. The proceeds are expected to fund the design and implementation of an expansion of its existing semiconductor assembly and test facility in Kuala Lumpur, Malaysia.

Source: NXP - SEC EDGAR / 8-K Sep 3, 2026

4	Tech Partnerships & Joint Research	No signal in September
5	Top Executives' Activities	No signal in September

Business Developments

Target technology — **RF chips for satellite communications and radar**

The financial obligations under the facility agreement, alongside a potential second agreement, are fully guaranteed by NXP Semiconductors N.V., NXP Funding LLC, and NXP USA, Inc. Borrowings can be denominated in U.S. Dollars or Euros with fixed or floating interest rates and feature a maximum tenor of six years.

Signal Details by Company

Norsk Hydro

Non-Ferrous Metals & Recycling | Norway

1	Supply Chain & Political Risk Management	No signal in September
2	Factory Expansion & Diversification of Production Bases	No signal in September
3	Capital Raising & Securing Liquidity	No signal in September
4	Tech Partnerships & Joint Research	

Hydro and CHANEL Fragrance and Beauty signed a strategic partnership to develop low-carbon aluminum packaging for the beauty and fragrance industry under a 2026–2030 roadmap, targeting a carbon footprint approaching 3.0 kilograms of CO_2 equivalent per kilogram by 2030 while exploring recycling and traceability.

Source: Norsk Hydro - News / Newsroom Sep 28, 2026

5	Top Executives' Activities	No signal in September

Business Developments

Target technology

Maximizing recycled (scrap) content in non-ferrous metal production

Hydro has joined a Siemens Mobility-led project alongside TSR Group and Voestalpine to recycle aluminum from decommissioned trains to produce new rail components. In this pilot study, Hydro will recycle the aluminum at its recycling facility in Ghlin, Belgium.

Source: Norsk Hydro - News / Newsroom Sep 11, 2026

Signal Details by Company

Vestas

Offshore Wind Turbines | Denmark

1	Supply Chain & Political Risk Management	No signal in September
2	Factory Expansion & Diversification of Production Bases	No signal in September
3	Capital Raising & Securing Liquidity	

Vestas received a grant of 6.680.065 DKK from EUDP (The Energy Technology Development and Demonstration Programme) for the Automated Service Inspections of Wind Turbines (ASI WTG) project.

Source: Vestas Sep 22, 2026

4	Tech Partnerships & Joint Research	No signal in September
5	Top Executives' Activities	No signal in September

Business Developments

Target technology **Offshore wind turbines**

Vestas has reached a milestone of 200 V236-15.0 MW wind turbines installed offshore, representing 3 GW of installed capacity. The 200th turbine was installed at Ecowende's 760 MW Hollandse Kust West VI offshore wind farm in the Dutch North Sea.

Signal Details by Company

Bayer

Pharmaceutical Excipients | Germany

1	Supply Chain & Political Risk Management	No signal in September
2	Factory Expansion & Diversification of Production Bases	No signal in September
3	Capital Raising & Securing Liquidity	

Apollo and KKR closed a €3 billion capital solution for Bayer on September 16, 2026, by investing equity capital into a newly established entity holding Bayer's long-acting reversible contraceptives business, where Bayer retains a majority stake.

Source: Apollo Global Management Sep 16, 2026

4	Tech Partnerships & Joint Research	No signal in September
5	Top Executives' Activities	No signal in September

Business Developments

Target technology **Pharmaceutical excipients**

The FDA granted accelerated approval to Bayer's tyrosine kinase inhibitor Hyrnuo as a first-line treatment for patients with locally advanced or metastatic non-squamous non-small cell lung cancer whose tumors test positive for HER2 tyrosine kinase domain activating mutations.

Source: Fierce Pharma Sep 9, 2026

Signal Details by Company

Merck

Pharmaceutical Excipients

Germany

1	Supply Chain & Political Risk Management	Merck KGaA will invest €13 million (about US$15 million) to expand its manufacturing facility in Bengaluru, India, to strengthen production and supply operations in the Asia-Pacific region and expand biology and chemistry capabilities. Source: BioProcess International Sep 18, 2026
2	Factory Expansion & Diversification of Production Bases	No signal in September
3	Capital Raising & Securing Liquidity	No signal in September
4	Tech Partnerships & Joint Research	No signal in September
5	Top Executives' Activities	No signal in September

Business Developments

Target technology **Pharmaceutical excipients**

Merck opened its imMEDIAte ADVANTAGE Center in Daejeon to provide small-scale, pre-GMP production of customized bioprocess materials, including cell culture media, feeds, supplements, and buffers, supporting customers during process development ahead of its larger manufacturing facility launch.

Signal Details by Company

Nexeon

Battery Anode Materials | UK

1	Supply Chain & Political Risk Management	No signal in September

2 Factory Expansion & Diversification of Production Bases

Nexeon will use the investment funds for a pilot manufacturing facility in the UK and ongoing research and development efforts.

Source: Solar Power Portal Sep 2, 2026

3 Capital Raising & Securing Liquidity

Nexeon closed a £100-million ($133-million) investment round, including a £52.6-million ($70-million) commitment from the UK's National Wealth Fund and participation from new investors The Korea Development Bank and Honda Xcelerator Ventures, to fund a UK-based pilot manufacturing facility, R&D work, and an expansion of its advanced manufacturing technology unit.

Source: Charged EVs Sep 9, 2026

4	Tech Partnerships & Joint Research	No signal in September
5	Top Executives' Activities	No signal in September

Business Developments

Target technology **CVD silicon-carbon (Si-C) anode materials**

Nexeon, headquartered in Abingdon near Oxford, is developing silicon anode materials to enable higher energy density lithium-ion batteries, helping reduce charging times and extend electric vehicle range. The National Wealth Fund's financing will support the company's development of a UK-based pilot manufacturing facility, research and development activities, and the expansion of its advanced manufacturing technology unit.

Global Business Developments by Company

These companies had no signals in September but reported developments tied directly to their target technologies. All are monitored for emerging signals.

Cognex

Machine Vision & Sensors | USA

Target technology

3D vision sensors

September Developments

Cognex has entered into a definitive agreement to acquire RealSense for approximately $500 million. The transaction is expected to close in the fourth quarter of 2026.

Source: Press release · Cognex - Press release JSON feed Sep 22, 2026

West Pharmaceutical

Drug Delivery & Fill-Finish | USA

Target technology

Autoinjector and prefilled-syringe (PFS) manufacturing and fill-finish

September Developments

West Pharmaceutical Services will cut 98 jobs at its operations in Scottsdale, Arizona, United States, as it phases out SmartDose 3.5mL production following the sale of the drug delivery system to AbbVie.

Source: Plastics News Sep 18, 2026

magniX

Aerospace & E-Propulsion | USA

Target technology

Electric motors and high-power battery propulsion modules for aircraft

September Developments

magniX's Samson300 batteries powered the first flight of Bye Aerospace's eFlyer 2 prototype at Centennial Airport near Denver, Colorado, U.S.

Global Business Developments by Company

EMM(Umicore)

Battery Anode Materials | Belgium

Target technology CVD silicon-carbon (Si-C) anode materials

September Developments

HS Hyosung Energy Solution Korea is a joint venture established by HS Hyosung Group and Belgian materials company Umicore with an 80% to 20% ownership split for the silicon anode materials business.

Source: THE ELEC, Korea Electronics Industry Media Sep 14, 2026

Umicore

Lithium & Cathode Materials | Belgium

Target technology Cathode raw materials (lithium hydroxide, lithium carbonate)

September Developments

Eco&Dream will supply 17.7 billion won worth of high-nickel nickel-cobalt-manganese (NCM) precursors to Umicore, and the materials will be used in batteries for electric vehicles produced in North America.

Source: THE ELEC, Korea Electronics Industry Media Sep 24, 2026

Siemens Gamesa

Offshore Wind Turbines | Spain

Target technology Offshore wind turbines

September Developments

Siemens Gamesa has taken Purus's service operation vessel Purus Horizon on a long-term charter for offshore wind maintenance in the North Sea, with work scheduled to start early in 2027.

Source: Splash247 Sep 28, 2026

Global Business Developments by Company

EVG

Advanced Packaging Equipment | Austria

Target technology

High-precision wafer-to-wafer (W2W) hybrid bonding equipment

September Developments

EV Group (EVG) stated on September 2 that it is accelerating customers' mass production of co-packaged optics (CPO) through its technology and infrastructure. Hybrid bonding is an advanced packaging technology that directly connects copper (Cu) surfaces when stacking and interconnecting two semiconductor chips or dies.

Source: THE ELEC, Korea Electronics Industry Media Sep 3, 2026

DNP

OLED Fine Metal Masks | Japan

Target technology

Fine metal masks (FMMs) for OLED displays

September Developments

Japan's DNP continues to dominate the market for the highest-specification FMMs. The company is expanding supplies of high-end FMMs to BOE and TCL CSOT this year and is also reported to be supplying thinner, higher-specification products to Samsung Display.

Source: THE ELEC, Korea Electronics Industry Media Sep 27, 2026

AGC

Semiconductor Glass Substrates | Japan

Target technology

Glass substrates and through-glass via (TGV) processing

September Developments

AGC has commercialized its alkali-free glass packaging substrate, making both 500 mm square panels and 300 mm diameter wafers available.
