

GLOBAL INVESTMENT SIGNAL MONITOR

Investment Signals

Monthly Pre-Decision Indicators Across 77 Priority Companies

Including 30 major Investment Promotion Projects

and 77 target companies selected by MOTIR

Tracking 5 leading indicators of Investment (Covering Pre-Decision Signals only)

5 LEADING INDICATORS OF INVESTMENT

- | | | |
|---|---|--|
| 1 | Supply Chain & Geopolitical Risk | Supplier shifts, de-risking, tariff and export-control responses |
| 2 | Production Expansion & New Sites | Plant expansions, new-site reviews and feasibility studies |
| 3 | Capital Raising & Liquidity | Large bond and share issues, loans and credit lines |
| 4 | R&D and Technology Partnerships | Joint research, licensing, PoCs and equity-stake talks |
| 5 | Executive Moves & Korea Visits | C-suite hires and exits, undisclosed Korea trips, site visits |

Investment Signals at a Glance

Signals found at the 77 companies during September 1–30, 2026. A highlighted cell marks an early plan or a preparatory step, not a committed or completed investment.

Advanced packaging

Austria

Korea seeks investment in Wafer-to-wafer hybrid bonding equipment

Developments in September

EV Group addresses manufacturing challenges for next-generation co-packaged optics through its portfolio of wafer bonding, nanoimprint lithography, and thin-wafer processing technologies, supported by its NILPhotonics Competence Center and Heterogeneous Integration Competence Center. Additionally, hybrid bonding enables the low-parasitic integration of PICs and electronic integrated circuits (EICs), while fusion bonding enables the heterogeneous integration of III-V semiconductor materials for laser fabrication and emerging modulation materials such as thin-film lithium niobate (TFLN) and barium titanate (BTO).
