Investment Signals

Monthly monitoring of investment signals across 77 target companies

30 major investment promotion projects · 77 target companies selected by MOTIR
5 key investment signals tracked per company · Pre-decision signals only

The 5 Key Investment Signals

1 **Supply Chain & Political Risk Management**
Reducing regional dependency, diversifying supply chains, and addressing regulatory risks

2 **Factory Expansion & Diversification of Production Bases**
New factory opening or facility construction in the Asia-Pacific (APAC) region

3 **Capital Raising & Securing Liquidity**
Getting extra cash by issuing corporate bonds, new share issuance, or bank loans

4 **Tech Partnerships & Joint Research**
Joint R&D, sharing tech licenses, testing new ideas, or buying shares in partner companies

5 **Top Executives' Activities**
C-level executives moving to new positions, business trips to Korea, or checking out local business sites

BESI

Advanced Packaging Equipment | Netherlands

1	Supply Chain & Political Risk Management	No signal in October
2	Factory Expansion & Diversification of Production Bases	No signal in October
3	Capital Raising & Securing Liquidity	No signal in October
4	Tech Partnerships & Joint Research	

Besi joined Applied Materials' EPIC Center as an Innovation Partner to expand their collaboration targeting next-generation 3D IC scaling, logic and memory integration, thermo-compression bonding scaling, and new integration platforms.

Source: Press release · Besi - Press Releases Oct 27, 2026

5	Top Executives' Activities	No signal in October

Business Developments

Target technology

High-precision wafer-to-wafer (W2W) hybrid bonding equipment

Applied Materials and BESI jointly developed Kinex, an integrated die-to-wafer hybrid bonding system combining Applied Materials' expertise in etching, planarization, deposition, and inspection with BESI's precision die placement and assembly technologies. Additionally, BESI reported that its third-quarter orders rose 96% year over year to €342.6 million, with hybrid bonding equipment orders in the first nine months of 2026 more than doubling full-year 2025 levels.

Norsk Hydro

Non-Ferrous Metals & Recycling | Norway

1	Supply Chain & Political Risk Management	No signal in October
2	Factory Expansion & Diversification of Production Bases	No signal in October
3	Capital Raising & Securing Liquidity	

Enova granted an additional NOK 82 million to Hydro for the development of the project's next phase, an industrial concept pilot for HalZero.

Source: Norsk Hydro - News / Newsroom Oct 19, 2026

4	Tech Partnerships & Joint Research	

In the Siemens Mobility-led Train2Train pilot, aluminum recovered from decommissioned trains will be recycled at Hydro's facility in Ghlin, Belgium, and processed into new extrusion billets to produce rail components at Hydro's extrusion facility in Harderwijk, the Netherlands.

Source: Norsk Hydro - News / Newsroom Oct 6, 2026

5	Top Executives' Activities	No signal in October

Business Developments

Target technology **Maximizing recycled (scrap) content in non-ferrous metal production**

1. Hydro experienced continued momentum for its low-carbon and recycled products, with leading brands like CHANEL Fragrances and Beauty, General Motors, and Mercedes-Benz integrating Hydro's solutions in their product lines.

   Source: Norsk Hydro - News / Investor News Oct 23, 2026

2. Hydro reached an annual post-consumer aluminum scrap recycling capacity of around 850,000 tonnes by the end of 2025 and is investing EUR 180 million in a new recycling plant in Torija, Spain. The facility will have an annual production capacity of 120,000 tonnes and will be able to process up to 70,000 tonnes of post-consumer aluminum scrap.

Signal Details by Company

Vestas

Offshore Wind Turbines | Denmark

1 Supply Chain & Political Risk Management

Vestas signed memoranda of understanding with Nippon Express and DENZAI to reinforce Japan's logistics and installation supply chain for offshore wind developments.

Source: TGS | 4C Offshore Oct 3, 2026

2 Factory Expansion & Diversification of Production Bases

Vestas signed an agreement with Japan's Ministry of Economy, Trade and Industry (METI) to advance a domestic wind turbine manufacturing base, laying the groundwork for a nacelle assembly facility by fiscal year 2029, subject to market conditions, and outlining a long-term roadmap for a full nacelle production site by fiscal year 2039.

Source: TGS | 4C Offshore Oct 3, 2026

3 Capital Raising & Securing Liquidity — No signal in October

4 Tech Partnerships & Joint Research

Vestas signed a memorandum of understanding with Neretek to explore deploying their foundation and turbine technologies on deeper-water offshore wind projects, including assessing Neretek's BC90 foundation concept with Vestas's turbines for the Other Deep Water Offshore Wind segment.

Source: Offshore Wind Oct 7, 2026

5 Top Executives' Activities — No signal in October

Business Developments

Target technology: **Offshore wind turbines**

1. On October 13, 2026, Vestas completed the assembly of Taiwan's first V236-15.0 MW™ offshore wind turbine hub, supporting progress on CIP's 495 MW Fengmiao 1 Offshore Wind Farm.
   Source: www.energy-omni.com Oct 13, 2026
2. Acta Marine's construction service operation vessel Acta Hercules, delivered earlier this year as the second of four new CSOVs, has a five-year charter with Vestas to support offshore wind projects across Northwest Europe. The vessel has already started working on its first assignment under the contract at the Hollandse Kust West project in the Netherlands.

Signal Details by Company

Rio Tinto

Lithium & Cathode Materials | UK

1	Supply Chain & Political Risk Management	Rio Tinto plans to invest approximately US$4 billion in growth capital across its Argentine lithium operations and expects to spend around 70 percent of it with local suppliers. Source: Investing News Network Oct 29, 2026
2	Factory Expansion & Diversification of Production Bases	No signal in October
3	Capital Raising & Securing Liquidity	No signal in October
4	Tech Partnerships & Joint Research	No signal in October
5	Top Executives' Activities	No signal in October

Business Developments

Target technology — **Cathode raw materials (lithium hydroxide, lithium carbonate)**

1. Rio Tinto officially opened its Fénix 1B expansion and Sal de Vida operation in Catamarca, Argentina, following a combined investment of around $1.4 billion. The projects achieved first production in the second quarter and will add 25,000 tonnes of annual lithium carbonate equivalent capacity once fully ramped up.
   Source: Press release · Rio Tinto Oct 29, 2026
2. Rio Tinto reported that its year-to-date lithium carbonate equivalent (LCE) production increased 33% to 40.3 kt, with third-quarter production reaching 13.0 kt despite adverse weather impacting operations. The Fenix 1B ramp-up continues to progress well, and full-year guidance remains unchanged at the lower end of 61 to 64 kt.

Signal Details by Company

HyProMag

Rare Earths & Magnet Recycling | UK

1 Supply Chain & Political Risk Management

HyProMag USA deployed its third Spanish-made Inserma Anoia S.L. hard disk drive separation system as a mobile processing unit to expand its processing and customer engagement capabilities across the U.S., marking a key step in the Dallas-Fort Worth project.

Source: Recycling Today Oct 20, 2026

2 Factory Expansion & Diversification of Production Bases

HyProMag USA completed a pre-feasibility study assessing a possible expansion of its proposed rare earth magnet manufacturing platform in the United States beyond its first plant in Northlake, Texas.

Source: IndexBox Oct 29, 2026

3	Capital Raising & Securing Liquidity	No signal in October
4	Tech Partnerships & Joint Research	No signal in October
5	Top Executives' Activities	No signal in October

Business Developments

Target technology **High-purity rare-earth recovery from end-of-life permanent magnets**

1. HyProMag is developing advanced rare earth magnet recycling and manufacturing operations to establish a secure domestic supply chain in the United States for neodymium iron boron magnets, which are essential components for AI infrastructure, defense systems, robotics, electric vehicles, and advanced electronics.
   Source: Mining.com Oct 28, 2026
2. PegasusTSI has started a contractor-selection process for HyProMag USA's cutting and finishing facility in Texas, while Weston Solutions is progressing permitting activities.
   Source: Share Talk Oct 13, 2026
3. Following formal power supply discussions announced on June 22, 2026, HyProMag USA secured electrical power capacity with Oncor Electric Delivery Company LLC for the Texas Hub development and expects the facility's electricity requirements to be supplied predominantly from renewable energy resources.

Air Liquide

Industrial Gases | France

1	Supply Chain & Political Risk Management	No signal in October

2 Factory Expansion & Diversification of Production Bases

As part of its new 2030 strategic plan, "BEYOND," Air Liquide planned industrial investment decisions of about €24 billion.

Source: Yahoo Finance Oct 5, 2026

3 Capital Raising & Securing Liquidity

On October 6, 2026, Air Liquide issued a 2 billion euros multi-tranche bond in France with 2-year, 5-year, and 10-year maturities at a weighted average interest rate below 4.00% per annum. Net proceeds will fund general corporate purposes and debt refinancing. The issue received A ratings from Standard & Poor's and Scope Ratings, and an A2 rating from Moody's.

Source: Press release · Air Liquide - Press Releases & News / Press Releases / News Oct 6, 2026

4 Tech Partnerships & Joint Research

Air Liquide, the Ecole normale supérieure (ENS-PSL), and the ENS Foundation created a research chair titled "Artificial Intelligence for chemistry and through chemistry".

Source: Press release · Air Liquide - Press Releases & News / Press Releases / News Oct 29, 2026

5	Top Executives' Activities	No signal in October

Business Developments

1. Air Liquide closed the €2.85 billion acquisition of South Korea-based DIG Airgas and will build a plant in Taiwan to boost capacity for high-purity gases amid rising AI-driven demand.

   Source: TradingView Oct 30, 2026

2. To support semiconductor and AI market momentum in Japan, Air Liquide has invested more than €170 million to help a leading semiconductor manufacturer expand its manufacturing capabilities, notably at an existing logic chip production facility. Air Liquide will build, own, and operate several production units to supply large volumes of ultra-pure gases.
