### GLOBAL BUSINESS

### Target technology

### silicon anode material technology

Nexeon completed a £100 million investment round to expand its UK operations and strengthen the battery supply chain, with £52.6 million committed by the National Wealth Fund and new participation from Korea Development Bank and Honda Xcelerator Ventures. The funding supports commercialisation and scale-up of silicon anode materials for higher-energy-density lithium-ion batteries, enabling shorter charging times and longer electric-vehicle range. Nexeon is also developing a UK pilot manufacturing facility and expanding its advanced manufacturing technology unit to support R&D, skilled employment, high-volume manufacturing and global customer adoption. Its first volume production facility dedicated to silicon-carbon materials is operating in Gunsan, South Korea.

# Global Business Trends by Item

Companies with no signal among the five indicators this month, but with global business activity in August directly tied to their target item or technology. Monitored for potential escalation into a signal.

## Charles River

Bioanalysis & safety testing

USA

Target item / technology **virus validation and MCB/WCB characterization**

Global business trend, August

Charles River Laboratories is collaborating with Medigen Vaccine Biologics to support development of a next-generation multivalent enterovirus vaccine and to characterize and validate its virus seed bank. The program applies next-generation sequencing and other advanced analytical platforms, including cGMP testing services, for pathogen detection and genetic characterization.

## Albemarle

Battery cathode materials

USA

Target item / technology **cathode material lithium hydroxide/carbonate**

Global business trend, August

Albemarle reported second-quarter 2026 consolidated net sales of \$1.7 billion, up 31% year over year, supported by higher pricing in Energy Storage and higher pricing and volumes in Specialties. Energy Storage net sales reached \$1.3 billion, an increase of 78%, primarily driven by higher prices.

## Ouster

Robotics LiDAR

USA

Target item / technology **robot LiDAR**

Global business trend, August

Ouster announced that GUSS Automation, a wholly owned John Deere subsidiary, plans to integrate Ouster's Rev8 OS0 native-color digital lidar sensors into its next-generation autonomous orchard machine fleet. Powered by L4 Ouster Silicon, the sensors are expected to improve perception and safety in complex outdoor agricultural environments.

# Global Business Trends by Item

NXP

Aerospace RF chips

Netherlands

Target item / technology

RF semiconductor for satellite communication and radar

Global business trend, August

NXP’s Trimension NCJ29D6 family will be deployed across BMW Group vehicles, beginning with selected 2026 vehicle programs. The automotive UWB solution combines secure fine ranging and short-range radar in a single chip, supporting safety applications such as presence detection.
