## GLOBAL BUSINESS STATUS

Target item/tech

## Virus validation and MCB/WCB characterization

On August 20, 2026, Charles River Laboratories partnered with Medigen Vaccine Biologics Corp. to characterize and validate the virus seed bank for MVC's next-generation multivalent enterovirus vaccine. The companies will leverage advanced analytical platforms including Next-Generation Sequencing to accelerate high-quality vaccine development and support global regulatory readiness.

## GLOBAL BUSINESS STATUS

Target item/tech

Silicon anode material technology

Nexeon has completed its latest investment round totalling £100 million (\$133 million), backed by the National Wealth Fund, Korea Development Bank, and Honda Xcelerator Ventures. The funding will support the development of a UK-based pilot manufacturing facility and the expansion of its advanced manufacturing technology unit. Additionally, Nexeon recently brought online the world's first volume production facility for silicon-carbon materials in Gunsan, South Korea.

# Item-Linked Global Business Trends

Companies without a five-signal profile this month, but where a global business trend directly linked to a target item/tech was detected in August. For companies exempt from the technology-link check, key business activity is shown and the card says so. Monitored for potential signal development.

## Moderna

Cell & gene therapy

USA

Target item/tech    **Gene/cell therapy delivery vector and GMP raw material**

August global business trend

Moderna and Merck announced initial results from a late-stage trial for an experimental melanoma treatment using an mRNA-based cancer vaccine. For over 1,000 participants who had their melanoma surgically removed, the treatment reduced the likelihood of their cancer returning or spreading.  
 Source Google News: WBUR 2026.08.25

## Albemarle

Battery cathode materials

USA

Target item/tech    **Cathode material lithium hydroxide/carbonate**

August global business trend

Albemarle reported \$1.3 billion in Energy Storage net sales and 65 kilotons LCE in sales volume for the second quarter of 2026. Increased output from the Wodgina mine partially offset the delay in the Talison CGP3 ramp due to a fire, with full-year sales volumes expected to range between 225 and 235 kilotons LCE.

# Item-Linked Global Business Trends

## Skyworks

Autonomous driving chips

USA

Target item/tech    **Autonomous vehicle IMU/RF/baseband chip**

August global business trend

Skyworks expanded automotive engagements spanning telematics and in-vehicle infotainment with leading global original equipment manufacturers, expecting connectivity and power products to broaden its presence across multiyear vehicle platforms.

Source Google News: Yahoo Finance 2026.08.27

## Ouster

Robotics LiDAR

USA

Target item/tech    **Robot LiDAR**

August global business trend

On August 26, 2026, Ouster announced that GUSS Automation, a wholly owned subsidiary of John Deere, plans to incorporate Ouster's Rev8 OS0 digital lidar sensors into the next generation of its Autonomous Orchard Machine Fleet. The integration is expected to further expand machine capabilities and enhance environmental perception in complex agricultural operations.

# Item-Linked Global Business Trends

## Norsk Hydro

Non-ferrous metal recycling

Norway

Target item/tech **Non-ferrous metal scrap recycling and utilization**

August global business trend

Norsk Hydro will supply Hydro CIRCAL, an aluminium alloy composed of at least 75 percent post-consumer scrap produced at its Cassopolis, Michigan recycling facility, for the front bumper system of General Motors' 2026 Cadillac OPTIQ. Automotive supplier Shape Corp. will engineer and assemble the bumper system to GM specifications.

## Renishaw

Precision position metrology

UK

Target item/tech **Linear scale**

August global business trend

Renishaw launched the next-generation RLE interferometric laser encoder systems, including RLE100, RLE200, and RLE300, for advanced motion control in semiconductor manufacturing. The new encoder family offers enhanced metrology performance, modular plug-and-play architecture, and improved serviceability to help semiconductor equipment manufacturers achieve higher positioning accuracy and reduced maintenance overheads.

## Nabtesco

Robot precision drives

Japan

Target item/tech **Robot reducer**

August global business trend

Nabtesco reported that orders for precision reduction gears continued to steadily increase in the second quarter of 2026, rising 11% quarter-on-quarter and 23% year-on-year. In line with the rising order volume, the capacity utilization rate for the Tsu Plant reached 85% and the Changzhou Plant reached 100% in the second quarter of 2026. Additionally, the company started customer deliveries of the RV mini as planned.
