

GLOBAL INVESTMENT SIGNAL MONITOR

Investment Signals

Monthly Pre-Decision Indicators Across 77 Priority Companies

Including 30 major Investment Promotion Projects

and 77 target companies selected by MOTIR

Tracking 5 leading indicators of Investment (Covering Pre-Decision Signals only)

5 LEADING INDICATORS OF INVESTMENT

- | | | |
|---|---|--|
| 1 | Supply Chain & Geopolitical Risk | Supplier shifts, de-risking, tariff and export-control responses |
| 2 | Production Expansion & New Sites | Plant expansions, new-site reviews and feasibility studies |
| 3 | Capital Raising & Liquidity | Large bond and share issues, loans and credit lines |
| 4 | R&D and Technology Partnerships | Joint research, licensing, PoCs and equity-stake talks |
| 5 | Executive Moves & Korea Visits | C-suite hires and exits, undisclosed Korea trips, site visits |

Investment Signals at a Glance

Signals found at the 77 companies during September 1–30, 2026. A highlighted cell marks an early plan or a preparatory step, not a committed or completed investment.

Korea seeks investment in

PVDF (polyvinylidene fluoride)

Business news · product link not confirmed

PI Advanced Materials, an Arkema affiliate, received the 2026 KPCA Industry award on September 9 at Gyeongwonjae in Incheon, South Korea, for contributions to the world's first mass-production of 4µm ultra-thin polyimide film using an unstretched process. The 4µm polyimide film achieved mechanical, thermal, and adhesion performance comparable to conventional 12.5µm polyimide film at approximately one-third the thickness.

Cognex

Machine vision & sensors

USA

Korea seeks investment in

3D vision sensors

Developments in September

On September 22, 2026, Cognex agreed to acquire RealSense, a leader in depth-sensing cameras and vision technology, for \$500 million in an all-cash transaction funded from existing cash and investments. The transaction is expected to close in the fourth quarter of 2026, subject to customary closing conditions.

Charles River

Bioanalysis & safety testing

USA

Korea seeks investment in

Viral safety testing and cell bank (MCB/WCB) characterization

Developments in September

On September 17, 2026, in Wilmington, Massachusetts, Charles River Laboratories introduced rapid cell banking programs offering a 40% reduction in cell bank production timelines compared to the 20-week industry standard. By combining rapid cell bank and release packages with advanced characterization using Next-Generation Sequencing (NGS), the company delivers an end-to-end solution for biopharmaceutical and advanced therapy developers.

Advanced packaging

Austria

Korea seeks investment in Wafer-to-wafer hybrid bonding equipment

Developments in September

EV Group addresses manufacturing challenges for next-generation co-packaged optics through its wafer bonding, nanoimprint lithography, and thin-wafer processing technologies supported by its NILPhotonics Competence Center and Heterogeneous Integration Competence Center. Its hybrid bonding enables low-parasitic integration of PICs and EICs, while fusion bonding supports heterogeneous integration of III-V semiconductor materials and emerging modulation materials such as thin-film lithium niobate and barium titanate.
