

Investment Signals

Monthly Pre-Decision Indicators Across 77 Priority Companies

Including 30 major Investment Promotion Projects

and 77 target companies selected by MOTIR

Tracking 5 leading indicators of Investment (Covering Pre-Decision Signals only)

5 LEADING INDICATORS OF INVESTMENT

1 Supply Chain & Geopolitical Risk

New suppliers, local sourcing and responses to geopolitical risk

2 Production Expansion & Geographical Diversification

New capacity, Asia-Pacific sites and feasibility studies

3 Capital Raising & Securing Liquidity

Bond and share issues, loans and credit facilities

4 Tech Ecosystem Partnerships (R&D)

Joint R&D, licensing, pilot projects and equity stakes

5 C-Suite Actions

Senior appointments, visits to Korea and site inspections

Investment Signals at a Glance

Signals found at the 77 companies during August 1–31, 2026. A highlighted cell marks an early plan or a preparatory step, not a committed or completed investment.

Business Developments by Product

Companies with no investment signal this month but with August news on the product Korea seeks from them. Cards marked "General company news" cover the company's main business instead. Any of these could turn into an investment signal.

Cytiva

Bioprocess equipment

USA

Korea seeks investment in

Cell culture and purification systems for biologics

Developments in August

Mycenax Biotech used Cytiva's GoSilico AI platform in GMP operations to produce 3,000 virtual simulations from five experiments, validating FDA QbD standards. The results were presented on July 3, 2026, at a Taipei seminar.

Ouster

Robotics LiDAR

USA

Korea seeks investment in

LiDAR for robots

Developments in August

GUSS Automation, a wholly owned John Deere subsidiary, plans to incorporate Ouster's Rev8 OS0 native color digital lidar sensors, powered by L4 Ouster Silicon, into the next generation of its Autonomous Orchard Machine Fleet.

Source Press release · Ouster 2026.08.26

Business Developments by Product

Norsk Hydro

Non-ferrous metal recycling

Norway

Korea seeks investment in

Non-ferrous metal scrap recycling

Developments in August

General Motors' Cadillac OPTIQ will feature a front bumper system made with Hydro CIRCAL, an advanced aluminum alloy composed of at least 75 percent post-consumer scrap produced at Hydro's recycling facility in Cassopolis, Michigan. Hydro will supply the material, and Shape Corp. will engineer and assemble the bumper system to General Motors specifications.

Source Norsk Hydro - News / Newsroom 2026.08.05

Siemens Gamesa

Offshore wind turbines

Spain

Korea seeks investment in

Offshore wind turbines

Developments in August

Siemens Gamesa reported a positive result for the first time since fiscal year 2022, with revenue rising year-over-year due to an increase in the offshore business, and remains on track to reach break-even for 2026.

Business Developments by Product

Renishaw

Precision position encoders

UK

Korea seeks investment in

Linear encoders

Developments in August

Renishaw launched its next-generation RLE interferometric laser encoder systems for advanced motion control in semiconductor manufacturing. The new product range comprises the RLE100, RLE200, and RLE300 systems, which provide precision position feedback. The company will present these systems at SEMICON Taiwan 2026 in Taipei City and SEMICON West 2026 in San Francisco.

HyProMag

Rare-earth magnet recycling

UK

Korea seeks investment in

High-purity rare earths recovered from end-of-life magnets

Developments in August

Mkango completed the acquisition of the Remloy rare earth magnet recycling business from Heraeus Amloy Technologies GmbH for €8 million in cash, with €5 million settled at closing and €3 million payable on August 28, 2028. Remloy operates a plant in Bitterfeld, Germany, that recycles end-of-life rare earth magnets via a melting process to produce neodymium-iron-boron alloy powders, targeting a capacity of at least 500 tonnes per year.
