Monitor

30 Major Investment-Attraction Projects (MOTIE) · 77 Target Companies
Five investment signals per company · Pre-confirmation indicators only

FIVE LEADING SIGNAL INDICATORS

- 1 Supply Chain & Geopolitical Risk** Dependence reduction, diversification, regulatory risk, etc.
- 2 Production Expansion & Diversification** APAC expansion reviews, feasibility studies, etc.
- 3 Capital Securing & Financing** Large bond issues, equity raises, credit lines, etc.
- 4 Tech Ecosystem Engagement (R&D)** Joint research, licensing, PoC matching, equity, etc.
- 5 Strategic Executive Move** C-level moves, quiet visits, due-diligence signs, etc.

This Month's Signal Matrix

Investment signals (pre-confirmation) across the 77 target companies for August (2026.8.1~8.31). A highlighted cell marks a signal detected during the month; lagging data such as completed deals are excluded.

GLOBAL BUSINESS STATUS

 Target item

robot LiDAR

Ouster announced that GUSS Automation, a wholly owned subsidiary of John Deere, plans to integrate Ouster's REV8 digital lidar sensors into its next-generation fleet of autonomous orchard machines. The collaboration brings high-resolution 3D depth data and advanced perception capabilities to complex agricultural environments like orchards and vineyards. This technology enables a single operator to simultaneously monitor up to eight autonomous sprayers and vehicles with enhanced safety and precision.

GLOBAL BUSINESS STATUS

 Target tech

silicon anode material technology

Nexeon is advancing its business by leveraging cutting-edge silicon anode materials to increase lithium-ion battery energy density and reduce charging times. The company completed a GBP 100 million investment round backed by the National Wealth Fund and Korea Development Bank to develop a pilot manufacturing facility in the UK. Additionally, Nexeon recently brought online the world's first volume production facility for silicon-carbon materials in Gunsan, South Korea, accelerating global customer adoption.

GLOBAL BUSINESS STATUS

 Target tech

rare earth extraction from end-of-life permanent magnets

Mkango Resources has completed the acquisition of the Remloy rare earth magnet recycling business from Heraeus Amloy Technologies GmbH for €8 million. Through this transaction, Mkango gains the Remloy production facility in Bitterfeld, Germany, which recycles end-of-life rare earth magnets to produce neodymium-iron-boron alloy powders. This complements HyProMag's short-loop recycling process and Mkango UK's long-loop recycling process, significantly strengthening the rare earth supply chain and manufacturing ecosystem in Europe.

Item-Linked Global Business Trends

Companies without a five-signal profile this month, but where a global business trend directly linked to a target item/tech was detected in August — monitored for potential signal development.

Albemarle

Battery cathode materials

USA

Target item/tech Cathode material lithium hydroxide/carbonate

August global business trend

Albemarle reported its second-quarter 2026 results, highlighting that Energy Storage net sales reached \$1.3 billion driven by higher lithium pricing. The company also noted that the impact on sales volume from the Talison CGP3 fire was minimized due to better-than-planned output from the Wodgina mine.

Siemens-Gamesa

Offshore wind turbines

Spain

Target item/tech Offshore wind turbine

August global business trend

Siemens Energy announced in its Q3 FY26 earnings release that Siemens Gamesa returned to quarterly profitability for the first time since fiscal 2022 and remains on track to reach break-even for 2026. The wind business segment achieved significant profitability improvements driven by productivity gains and increased cost efficiency.

Nabtesco

Robot precision drives

Japan

Target item/tech Robot reducer

August global business trend

Nabtesco announced its semiannual report for the first half of fiscal 2026, reporting that sales in the Component Solutions Business increased by 23.6% year-on-year to ¥45,521 million. The company noted that sales of precision reduction gears grew due to favorable demand for industrial robots, primarily from automobile manufacturers in China and South Korea.
